This FREE TRIAL Issue shows you
how to keep better informed by
taking the "search" out of research...

If you, like so many other scientists and engineers, have trouble keeping up with the spate of computer and data processing information continually pouring from the presses, I think you'll welcome news of one publication that can put an end to this problem. And we'd like to help you prove this for yourself through our FREE TRIAL Offer, as explained below.

We're talking about Information Processing Journal, a solidly established scientific publication, now in its fourth year of serving as "first reader" for hard-pressed individuals like yourself. Subscribing to the Journal is like hiring a whole staff of scientists to do your reading for you - and provide you with digests you can absorb quickly.

For example...each month the Journal's staff of scientists reviews the entire published output on computer and data processing...a feat no one individual could possibly accomplish. From this flood of material we select the significant for presentation in IP Journal in abstract form.

The result is hundreds of brief but informative abstracts brought together in each issue of the Journal...the gist of the best from over 250 sources - papers, books, conference proceedings, government and company reports and patents. Written for scientists, by scientists.

The Journal's contents are not only as authoritative and timely as you can get, but coverage is the most comprehensive of any publication in the field. A glance at the Table of Contents enclosed will show you what we mean.

Note, too, the quality of selection. Nothing of passing interest, but all items of lasting usefulness. Back issues of the Journal, rather than becoming obsolete, actually become more valuable...form a sound core for your library.

Want to investigate a new field, research a specific topic, prepare a bibliography, delve more deeply into your own area? IP Journal makes it easy. Every abstract is thoroughly documented. Each issue, completely indexed. And the final issue of each year contains a bound-in cumulative index for that year.

Doesn't it figure that a man as busy as you are should have the advantage of this time-saving, up-to-the-minute source of information?

We're so confident that once you examine a copy of the Journal you won't ever want to work without it, we're willing to make you a special FREE TRIAL Offer. Actually, a choice of four offers, all with the same free trial issue. Here they are...

Offer A - Vol. 1 - 4 @ \$180 U.S., Canada, \$220 Overseas ... SAVE \$20.00
Offer B - Vol. 4 - 6 @ \$150 U.S., Canada, \$180 Overseas ... SAVE \$20.00
Offer C - Vol. 1 - 6 @ \$275 U.S., Canada, \$335 Overseas ... SAVE \$45.00
Offer D - Vol. 4 @ \$ 50 U.S., Canada, \$ 60 Overseas

When you subscribe to any one of the above offers, we will immediately mail you - on a FREE TRIAL basis, the first issue of the current volume. If you have subscribed to Offers A or C, we will also mail you the back issues in your subscription. If for some reason you are not completely satisfied, simply tell us to cancel your subscription, return to us the back issues, and keep the free trial issue with our compliments.

If you subscribe to Offers B or D, we will mail you the first issue of Vol. 4. If it doesn't measure up to your expectations, simply send us instructions to cancel your subscription, keep the free trial issue and owe us nothing.

Please don't delay. Beginning with Vol. 5, IP Journal will go up to \$60 in the U.S.A., \$70. overseas. You can beat this rise in cost by subscribing now. So, hurry...sign, check and return the enclosed Request Card today. No postage necessary.

Sincerely,

Geoffrey Knight, Jr.

Geoffrey Knight
President

TABLE OF CONTENTS

Abstracts of the Literature on Information Processing

0. GENERAL; PEOPLE AND SOURCES	4	9. PROBABILITY, INFORMATION THEORY AND COMMUNICATION SYSTEMS	99
1. LOGIC AND SWITCHING THEORY	11	10. SCIENCE, ENGINEERING AND MEDICINE	116
2. DIGITAL COMPUTERS AND SYSTEMS	19	11. ANALOG AND HYBRID COMPUTERS	143
3. LOGIC DEVICES AND CIRCUITS (HARDWARE)	32	12. REAL-TIME SYSTEMS AND AUTOMATIC CONTROL; INDUSTRIAL APPLICATIONS	149
4. DIGITAL STORAGE AND INPUT-OUTPUT EQUIPMENT	41	13. GOVERNMENT, MILITARY AND TRANS- PORTATION APPLICATIONS	160
5. PROGRAMMING AND CODING OF DIGITAL MACHINES	51	14. BUSINESS APPLICATIONS OF INFORMA- TION PROCESSING	166
6. HUMAN COMMUNICATION, DOCUMEN- TATION AND HUMANITIES	65	TOPIC INDEX	176
7. BEHAVIORAL SCIENCE AND ARTIFICIAL INTELLIGENCE	71	SUBJECT INDEX	179
8. MATHEMATICS	81	AUTHOR INDEX	220

PUBLISHED BY

Cambridge Communications Corporation, 238 Main Street, Cambridge, Massachusetts 02142 Tel. 491-0710
Subscription Rate: U.S.A. and Canada — \$50. per year — Special 3 year rate — \$135;
Foreign \$60. per year — Special 3 year rate — \$165.
Back Issues: Single Issue \$7.50 U.S.A. and Canada, \$8.00 Foreign; Double Issues \$15.00 U.S.A. and Canada;
\$16.00 Foreign. Advertising Rates on Request.

PROCEDURES FOR SECURING REPRINTS — See Page 178

SYMBOLS USED IN THE ABSTRACTS

L: Letter to the Editor. A: Only an abstract is given in the reference. R: Only a review is given in the reference.
E: Erratum. The reference numbers in the indices are the abstract numbers, not the page numbers.

EXTENDED TABLE OF CONTENTS (Continued)

5.47	Supervisory Program Systems; Executive or Monitor Routines; Operating Systems	58	8.63	Ordinary Differential Equations	93
5.5	Program Debugging and Test	60	8.64	Integral Equations	94
5.6	Programming Multiprogram Computing Systems (Multi- processing); Time-Sharing	60	8.65	Integral Transforms	95
5.9	Programming of Files (including Sorting and Merging)	62	8.66	Functions of a Complex Variable	95
	Listing of Programs Referred to in this issue	62	8.67	Partial Differential Equations	95
6.	HUMAN COMMUNICATION, DOCUMENTATION AND HUMANITIES		8.670	General	95
6.0	General	65	8.671	Laplace's Equation	96
6.1	Formal Languages and Systems (including Context-Free Languages) (See also 5.3)	65	8.672	Poisson's Equation	96
6.2	Symbol Manipulation (including Lists and Trees)	65	8.673	Elliptic Equations	96
6.4	Natural Languages, Linguistics and Mechanical Translation	66	8.675	Parabolic Equations	96
6.5	Human Communication Patterns	67	8.676	Sturm-Liouville Equations	96
6.6	Documentation (Information Storage and Retrieval)	67	8.677	Other Linear Partial Differential Equations	97
	6.60 General	67	8.678	Nonlinear Partial Differential Equations	97
	6.61 Principles of Documentation	68	8.679	Stability of Partial Differential Equation Solution	97
	6.62 Machine Methods of Documentation	68	8.68	Calculus of Variations	98
	6.63 Indexing and Classifying	69	8.8	Combinatorial Mathematics	98
	6.66 Mechanized Information Retrieval Systems	69	8.9	Geometry	99
	6.67 Applications of Mechanized Documentation	70	9.	PROBABILITY, INFORMATION THEORY AND COMMUNICATION SYSTEMS	
6.8	Humanities and Social Sciences (including Literature)	70	9.1	Probability	99
7.	BEHAVIORAL SCIENCE AND ARTIFICIAL INTELLIGENCE		9.11	Discrete Probability Theory	99
7.1	Pattern and Character Recognition and Detection	71	9.13	Random or Pseudorandom Numbers	99
	7.11 Principles of Pattern and Character Recognition	71	9.16	Time Series (Stochastic Chains)	100
	7.12 Pattern Detection	72	9.17	Smoothing and Prediction	100
	7.15 Recognition of Spatial Characters	73	9.18	Random Parameter Systems (Stochastic Processes)	100
	7.19 Application of Pattern and Character Recognition Techniques	74	9.2	Statistics	101
7.2	Speech Recognition and Production	74	9.20	General	101
7.3	Computer Applications to Psychology and Behavioral Science; Bionics	74	9.21	Determination of Statistical Distributions	101
	7.30 General	74	9.22	Statistical Parameter Calculation; Regression	101
	7.31 Behavioral Psychology	74	9.27	Sampling Theory and Inference; Sequential Analysis	101
	7.34 Learning and Adaptation in Humans and Animals	75	9.28	Statistical Decision Functions; Baye's Theorem	102
	7.35 Mental Processes; Thinking	75	9.3	Operations Research and Game Theory (See also 14.3)	102
	7.36 Bionics (See also 7.62)	75	9.30	General	102
	7.37 Human Dynamics	76	9.31	Mathematical Programming - General	102
7.5	Probabilistic and Self-Organizing Systems; Perceptrons	76	9.32	Dynamic Programming; Theory of Processes	102
7.6	Neurocybernetics (See also 7.36)	77	9.33	Linear Programming	103
7.7	Artificial Intelligence	77	9.35	Optimization of Systems	104
	7.70 General	77	9.36	Queueing Theory	104
	7.72 Learning and Adaptation in Machines	78	9.37	Theory of Games	105
	7.73 Formalization of Thought Processes	78	9.39	Mathematical Modeling	106
	7.74 Theorem Proving by Machine	79	9.4	Digital Simulation	106
	7.75 Problem Solving by Machine	79	9.5	Information Theory	106
	7.77 Game Playing by Machine	80	9.50	General	106
7.8	Man and the Machine (See 4.96 for Man-Machine Communi- cation Devices)	80	9.51	Noise (Interference)	107
8.	MATHEMATICS		9.52	Recovery of a Signal from Noise	107
8.1	Number Theory	81	9.53	Channel Capacity and Transmission Theory	108
8.2	Functional Approximations to Data	81	9.54	Coding Theory; Decodability	108
	8.20 General Theory	81	9.55	Group Codes	109
	8.21 Least Squares Approximations	82	9.56	Cyclic Codes	109
	8.23 Chebyshev and Minimax Approximations	82	9.58	Codes for Transmission Error Control (See also 2.4)	109
	8.27 Interpolation	83	9.59	Digital Filters	110
8.3	Computation of Functions; Operations with Series	83	9.6	Signal Analysis	111
	8.30 General	83	9.7	Communication and Broadcast Systems and Radar	112
	8.31 Manipulation of Functional Forms; Series	83	9.72	Pulse Modulation Theory and Methods	112
	8.32 Approximation to Analytically Specified Functions	84	9.74	Radar	112
	8.33 Computation of Roots of Numbers	84	9.75	Communication and Broadcast Techniques (including Digital Data Transmission)	112
	8.34 Computation of Special Functions	84	9.751	Television Broadcasting	113
8.4	Algebra and Analysis	86	9.752	Radio Broadcasting	113
	8.40 Manipulation of Algebraic Formulas	86	9.754	Voice Communications	113
	8.41 Solution of General Algebraic Equations	87	9.756	Coded Message Transmission; Teletype and Telegraph	113
	8.42 Systems of General Equations (including Extremum Problems) (See also 8.68)	87	9.758	Digital Data Transmission	114
	8.43 Roots of Polynomials (Solutions of Polynomial Equations)	88	9.77	Communications Networks and Switching	115
	8.44 Simultaneous Linear Equations	88	10.	SCIENCE, ENGINEERING AND MEDICINE	
	8.45 Calculation of Eigenvalues and Eigenvectors of Matrices	88	10.1	Electrical Science and Engineering	116
	8.46 Matrix Theory (Other than the Eigenvalue Problem)	89	10.13	Power Generation and Distribution	116
	8.48 Inequalities	90	10.14	Electric Circuit Theory	116
	8.49 Iterative Processes	91	10.15	Electric and Magnetic Fields	117
8.6	Calculus and Differential Equations	91	10.16	Physical Electronics	117
	8.61 Differentiation	91	10.17	Electronic Circuits	117
	8.62 Integration; Quadrature Methods	91	10.2	Mechanics; Mechanical and Civil Engineering; Heat	118
	8.620 General	91	10.21	Analytical Mechanics	118
	8.622 Expansion Methods	92	10.24	Mechanical Design	118
	8.624 Multiple Integration	92	10.25	Structures	119
	8.628 Stability and Error of Integration Methods; Predictor-Corrector Methods	92	10.27	Heat Engineering and Thermodynamics	120
			10.28	Fluid Mechanics	120
			10.29	Automotive Engineering	122
			10.3	Aeronautical Engineering and Design	122
			10.39	Naval Engineering	123
			10.4	Astronomy, Space and Geophysics	123
			10.40	General	123

EXTENDED TABLE OF CONTENTS (Continued)

10.41	Stellar and Planetary Structure	123	12. REAL-TIME SYSTEMS AND AUTOMATIC CONTROL; INDUSTRIAL APPLICATIONS	
10.42	Astronomical Instruments; Telescopes; Radioastronomy	123		
10.43	Space Exploration and Travel; Celestial Mechanics	124	12.0	General; Cybernetics 149
10.430	General	124	12.1	Control Systems Theory; Continuous Control 149
10.431	Space Vehicles	125	12.11	Man-Machine Control Systems 149
10.432	Space Vehicle Launching	125	12.12	Linear Automatic Control Systems; Feedback Systems 149
10.433	Satellite and Space Vehicle Orbits and Trajectories; Tracking; Space Environment	125	12.13	Synthesis of Continuous Control Systems 150
10.434	Propulsion	127	12.14	Higher-Order Control Systems 151
10.435	Space Vehicle Electrical Power	127	12.15	Nonlinear Control Systems 151
10.436	Space Flight Control; Telemetry	128	12.16	Adaptive (Learning, Self-Teaching) Control Systems 151
10.437	Re-Entry	128	12.19	Stability and Error in Automatic Control Systems 153
10.439	Celestial Mechanics	128	12.2	Sampled-Data Control Systems 153
10.44	Space Physics; Atmospheric Physics	128	12.4	Data Acquisition and Real-Time Data Transmission Systems 154
10.45	Meteorology; Weather	129	12.6	Real-Time Computers and Control Systems 154
10.46	Earth Sciences; Geology	130	12.8	Industrial Engineering and Production Techniques; Automation 156
10.47	Seismology	131	12.81	Job and Production Scheduling 156
10.48	Cartography; Map Making	131	12.82	Project Control (PERT, etc.); Critical Path Scheduling 156
10.49	Photography	132	12.83	Industrial Process Control; Automation 157
10.6	Chemistry and Chemical Engineering; Metallurgy	132	12.85	Numerical Control of Machine Tools and Production 159
10.60	General	132	13. GOVERNMENT, MILITARY AND TRANSPORTATION APPLICATIONS	
10.61	Molecular Structure	132	13.1	Government and Politics 160
10.62	Properties of Materials	132	13.2	Law 160
10.63	Chemical Reactions	132	13.3	Military Contact Applications 161
10.64	Chemical Analysis Techniques	133	13.31	Military Field Operations, Tactics and Strategy (including Command and Control) 161
10.68	Chemical Engineering; Chemical Processes	133	13.32	Observation and Reconnaissance; Intelligence 162
10.69	Metallurgy	134	13.33	Weapons Systems 163
10.7	Classical and Atomic Physics	134	13.34	Fire Control (Weapons Control) 163
10.72	Vibration and Sound	134	13.35	Missile Guidance, Tracking and Evaluation 163
10.73	Optics and Spectroscopy	135	13.36	Defense Warning Systems; Interception 164
10.75	Statistical Mechanics; Quantum Mechanics	135	13.4	Military Support Applications 164
10.76	Atomic Physics	136	13.6	Transportation Applications, Generally 164
10.77	Crystallography	136	13.7	Aviation 165
10.78	Solid State Physics	137	14. BUSINESS APPLICATIONS OF INFORMATION PROCESSING	
10.79	Plasma Physics; Magnetohydrodynamics	137	14.1	Business Data Processing Techniques 166
10.8	Nuclear Physics	137	14.10	General 166
10.80	General	137	14.12	Records 166
10.81	Principles of Nuclear Physics	138	14.13	Payroll 166
10.83	Nuclear Reactors	138	14.15	Billing and Accounting 167
10.87	Nuclear Particle Transport	138	14.16	Sales and Merchandising 167
10.88	Nuclear Instrumentation	139	14.17	Inventory or Stock Control 168
10.89	Health Aspects of Nuclear Physics	140	14.3	Management Science 169
10.9	Biology and Medicine	140	14.30	General 169
10.91	Medical Research	140	14.31	Management Data Acquisition 170
10.93	Medical Specialties (including Radiology and Psychophysiology)	141	14.32	Management Decision Making 170
10.94	Clinical Practice; Diagnosis	142	14.33	Management Information Dissemination 170
10.97	Biochemistry	142	14.34	Management Project Control 171
10.98	Biology	142	14.35	Systems Simulation for Management 171
10.99	Agriculture	142	14.36	Operations Research and Game Theory for Management Use 171
11. ANALOG AND HYBRID COMPUTERS			14.38	Materials Management and Resource Allocation 172
11.0	General	143	14.4	Economic Theory 172
11.2	Analog Computer Techniques and Systems	143	14.5	Specific Business Applications 172
11.3	Analog Computer Components	144	14.50	General 172
11.31	Operational Amplifiers	144	14.51	Large Diversified Companies 172
11.32	Multipliers and Squarers	144	14.52	Banking 172
11.33	Other Analog Arithmetic Units (including Dividers and Integrators)	145	14.53	Insurance 173
11.34	Function Generators	145	14.54	Investment; Stock Market 173
11.35	Analog Storage	146	14.55	Utilities 174
11.37	Analog Input-Output Systems	146	14.56	Printing and Publishing 174
11.5	Analog Computer Mathematical Methods and Applications	146	14.58	Retailing 175
11.7	Hybrid (Analog-Digital) Computers	147	14.59	Manufacturing and Distributing 175
11.9	Analog-Digital Conversion	147	14.8	Planning and Administration of Data Processing Installations 175
			14.9	Service Bureaus 175

NOTE

For an Alphabetical Index to this Extended Table of Contents see the Topic Index on p.176

information processing journal

free trial subscription

Gentlemen: Please enter my subscription to the Information Processing Journal as checked here. I understand, if I am not completely satisfied, I may cancel my subscription, and keep the first issue of Vol. 4.

☐ Bill me at this address:

T NELSON
VASSAR COLLEGE
POUGHKEEPSIE N Y 12601
J3

- ☐ A-Vol. 1-4 @ \$180 U.S., Canada, \$220, Overseas — SAVES \$20.00
- ☐ B-Vol. 4-6 @ \$150 U.S., Canada, \$180, Overseas — SAVES \$20.00
- ☐ C-Vol. 1-6 @ \$275 U.S., Canada, \$335, Overseas — SAVES \$45.00
- ☐ D-Vol. 4 @ \$ 50 U.S., Canada, \$ 60, Overseas
